ABOUT US

LOCAL ACHIEVEMENT

Europochette is a Belgian enterprise that invented the paper cutlery pouch in the early 2000s as a hygienic, efficient alternative to cutlery sets rolled in linen napkins. Paper cutlery pouches are a Belgian invention with a great impact, and we can be proud of that.

In 2001 the Europochette® cutlery pouch became a protected design, launching Europochette NV. The company has since grown and we now manufacture and distribute a wide range of tabletop disposables for commercial use such as paper cutlery pouches, placemats and high-quality napkins.

The Europochette group currently employs close to a hundred and fifty employees at three European sites. Europochette's headquarters and logistics centre are located in Kruibeke, Belgium.

SUSTAINABLE DISPOSABLES

All Europochette® products are made entirely of wood fibres; a versatile, recyclable and biodegradable resource, making our cutlery pouches important contributors to the circular economy. Our FSC® certification also guarantees that the paper is sourced responsibly from sustainably managed forests. FSC® certified products must comply with strict social, environmental and economic requirements, from forest to end product.

TANGIBLE QUALITY

We are committed to the creation of innovative, quality products each day. We care about the quality of our materials and products, but also of our work environment and the service we provide to customers. In 2017 our dedication was rewarded with the internationally recognised BRC quality label. We have consistently been awarded their AA certification for five years in a row since then.
